SCOPE OF JOURNAL

The Turkish Journal of Botany is published electronically 6 times a year by the Scientific and Technological Research Council of Turkey (TÜBİTAK) and accepts manuscripts (in English) covering all areas of plant biology (including genetics, evolution, systematics, structure, function, development, diversity, conservation biology, biogeography, paleobotany, ontogeny, functional morphology, ecology, reproductive biology, and pollination biology), all levels of organisation (molecular to ecosystem), and all plant groups and allied organisms (algae, fungi, and lichens). Authors are required to frame their research questions and discuss their results in terms of major questions in plant biology. In general, papers that are too narrowly focused, purely descriptive, or broad surveys, or that contain only preliminary data or natural history, will not be considered.

We received the sad news that Dr Núria Garcia-Jacas (Botanic Institute of Barcelona, Spain), who was an editor in Turkish Journal of Botany, passed away on the 28th of April, 2023. She made great contributions for improving the journal. She was a leading scientist in Asteraceae systematics, phylogeny, evolution, and biogeography; speciation models in Mediterranean basin; phylogeny, speciation, and polyploidy in *Centaurea*, and conservation genetic of the endemic species. She also established close collaborations with Turkish botanists. She will be remembered by all Turkish botanists with love and respect. May she rest in peace.

My condolences to the entire botanical community, her husband Alfonso Susanna, and her son Ramon.

Prof. Dr Asim KADIOĞLU

Editor-in-Chief of Turkish Journal of Botany
